BCSE308L	E308L Computer Networks			Т	Р	С
			3	0	0	3
Pre-requisite	NIL	Syllabus version				
			1	1.0		

Course Objectives

- 1. To build an understanding among students about the fundamental concepts of computer networking, protocols, architectures, and applications.
- 2. To help students to acquire knowledge in design, implement and analyze performance of OSI and TCP-IP based Architectures.
- 3. To identify the suitable application layer protocols for specific applications and its respective security mechanisms.

Course Outcomes

On completion of this course, student should be able to:

- 1. Interpret the different building blocks of Communication network and its architecture.
- 2. Contrast different types of switching networks and analyze the performance of network
- 3. Identify and analyze error and flow control mechanisms in data link layer.
- 4. Design sub-netting and analyze the performance of network layer with various routing protocols.
- 5. Compare various congestion control mechanisms and identify appropriate transport layer protocol for real time applications with appropriate security mechanism.

protocol for real time applications with appropriate security	mecnanism.						
Module:1 Networking Principles and Layered Architecture	6 hours						
Data Communications and Networking: A Communications Model – Data Communications -							
Evolution of network, Requirements , Applications, Network Topology (Line configuration,							
Data Flow), Protocols and Standards, Network Models (OSI, TCP/IP)							
Module:2 Circuit and Packet Switching	7 hours						
Switched Communications Networks – Circuit Switching – Packet Switching – Comparison							
of Circuit Switching and Packet Switching – Implementing Network Software, Networking							
Parameters(Transmission Impairment, Data Rate and Perform							
Module:3 Data Link Layer	8 hours						
Error Detection and Correction – Hamming Code, CRC, Chec							
mechanism - Sliding Window Protocol - GoBack - N - Selectiv							
Aloha - Slotted Aloha - CSMA, CSMA/CD - IEEE Standards(IE	EEE802.3 (Ethernet),						
IEEE802.11(WLAN))- RFID- Bluetooth Standards							
Module:4 Network Layer	8 hours						
IPV4 Address Space - Notations - Classful Addressing - Clas							
Address Translation – IPv6 Address Structure – IPv4 and IPv6 header format							
Module:5 Routing Protocols	6 hours						
Routing-Link State and Distance Vector Routing Protocols-Im	plementation-Performance						
Analysis- Packet Tracer							
Module:6 Transport Layer	5 hours						
TCP and UDP-Congestion Control-Effects of Congestion-Traff	ic Management-TCP						
Congestion Control-Congestion Avoidance Mechanisms-Queu	ing Mechanisms-QoS						
Parameters							
Module:7 Application layer	3 hours						
Application layer-Domain Name System-Case Study : FTP-HTTP-SMTP-SNMP							
Module:8 Contemporary Issues	2 hours						
Total Lecture hours:	45 hours						
Text Book							
1. Behrouz A. Forouzan, Data communication and Networking, 5th Edition, 2017,							

	McGraw Hill Education.						
Reference Books							
1.	. James F. Kurose and Keith W.Ross, Computer Networking: A Top-Down Approach, 6th						
	Edition, 2017, Pearson Education.						
2.	William Stallings, "Data and Computer Communication", 10th Edition, 2017, Pearson,						
	United Kingdom.						
Mode of Evaluation: CAT, Written Assignment, Quiz, FAT
